Description

Contrary to AC, OBSH is a white fine powder that decomposes at low temperature around 160°C. OBSH has an excellent storage stability as AC under normal conditions. But it is not readily dispersed in the polymers by conventional means, dispersion is improved by surface coating with small amounts of additives.

OBSH presents no problems in order, toxicity or discoloration.

Physical properties such as particle size, shape and decomposition temperature are important in applications.

Application

EPDM, CR, PVC, EVA

(EPDM-Weatherstrips, CR-Diving suits, PVC-Wallcoverings)

Transport&Storage Precautions

Expiration Date : 1 year

Storage Instruction : Keep container tightly closed in a dry and well-ventilated place.

Transport : Avoid contact with a direct ray of light and moisture.

Using : Wear protective gloves, dust mask and goggles.
